Hiring Manager

HISP-SA

(Home Office – South Africa and Lesotho)

Dear Hiring Manager,

I am writing to express my strong interest in the Systems Engineer position at HISP-SA. With hands-on experience in web and system development, a strong foundation in backend infrastructure, and a passion for building digital solutions that improve lives, I believe I am well-suited to support HISP-SA's mission of digital transformation in healthcare.

My recent role as a Full Stack Developer at **Motebo Technologies** involved integrating backend services using Python (Flask) and DynamoDB, as well as editing and improving Angular-based frontends. I also gained valuable industry experience during my internship at **TTJT LABS (Pty) Ltd**, where I worked on responsive front-end solutions using React.js and collaborated closely with designers and developers to deliver functional systems.

I am proficient in various technologies including Linux, MySQL, Python, and JavaScript, and have earned a certificate in Python Programming. My experience working remotely and across teams has taught me the importance of efficiency, communication, and adaptability—skills I believe are critical to supporting large-scale digital health initiatives.

What draws me to HISP-SA is your dedication to using open-source technologies to improve public health systems. I am inspired by your work and excited about the opportunity to contribute meaningfully through my technical abilities and drive to learn and grow.

I would welcome the opportunity to further discuss how my skills align with your team's goals. Please find my CV attached for your consideration. Thank you for your time and attention.

Yours sincerely,

Lebohang Monamane
